

$\vec{p} + p @ 510 \text{ GeV}$

Oleg Eyser

Time Meeting

March 7, 2017

STAR Operation

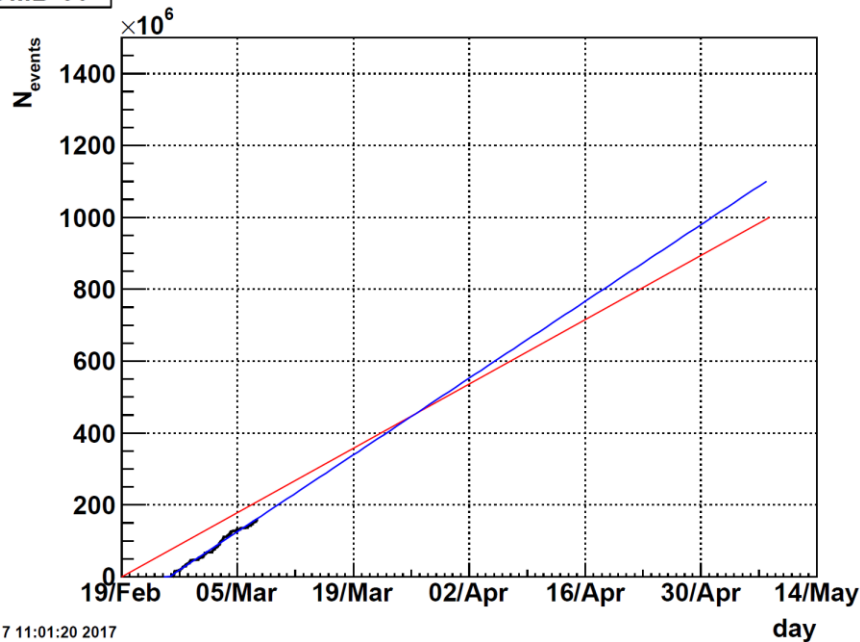

3/7/2017

2

- PHYSICS declared on Feb. 24
 - All detectors are under full shift crew control now
 - Minimize interruptions to operation
 - Improve running efficiency

Minimum Bias Trigger

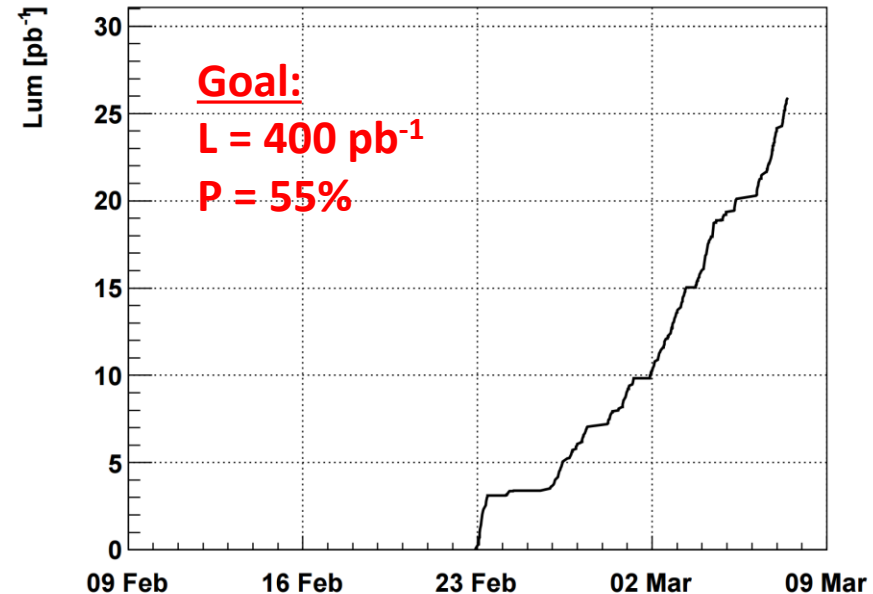

VPDMB-30

Tue Mar 7 11:01:20 2017

BHT3

Trigger for W-boson measurement

Tue Mar 7 11:00:33 2017

STAR Operation

- Forward Calorimeter (FMS)
 - Final iterations on Voltage settings for gain calibrations
 - Resolve trigger corruption for high luminosity measurement
 - UV system for curing of radiation damage in operation
- Muon Telescope Detector (MTD)
 - Final timing and calibration complete
 - In operation after prefire protection system is activated
- Rebalance trigger rates for all programs
- Next period coordinator: Salvatore Fazio
